

MCM PANEL ADVANTAGES

Common questions to ask yourself when considering “finished good” vs. “non-finished good” siding solutions:

- Time, coordination, job-site management and cleanup cost differentials.
- Are you paying for material “twice” due to damage that occurs prior to finishing?
- Are you experiencing project delays due to contractors?
- Are you paying more for scaffolding than otherwise necessary?
- Are you paying more in L&I than is necessary?
- What is the environmental benefit of having finishes applied in the warehouse vs. field applied?
- Does your project need LEED credits?
- Are competitor products recyclable and/or reusable?

INSTALLATION BENEFITS

Installing MCM panels is easy using off-the-shelf tools, i.e. circular saws, routers etc.,

- Tools are available at Lowes, Home depot, etc.,
- Proprietary router blades are available from OCULUS...in stock, thousands on hand.,
- Professional Installer training is available so your crews can maximize efficiency

The benefits of MCM Panels are clear - combining industry leading warranty protection, direct access to material and ease of installation we provide the protection and efficiencies you need as a contractor and the peace of mind you should expect as a consumer.
